

What is MYOB Acumatica Employee Onboarding?

MYOB Acumatica Employee Onboarding is a digital-first onboarding workflow available in the Employee Self-Service module of MYOB Acumatica Payroll.

Cloud-based onboarding sets your team up for success while relieving the burden on both payroll and HR. With MYOB Acumatica Payroll, you can use clever technology and automated workflows to streamline the onboarding experience and improve efficiency.

Because you are creating a strong digital-first experience, you avoid the hassle of chasing physical paper-based forms and manually keying them into your system. All data and personal information (including the ability to choose existing or new super funds) is collected securely and in real-time with integration directly into payroll and ready for the first pay run. This sends a message to your new starter that your team is serious about employee empowerment and that they can be supported to completed tasks quickly and easily.

Onboarding with
automation & confidence

A better day one experience

New starters benefit from a digital workflow that captures all the information at one time. Get the administration out of the way before their first day.

Save valuable time

Avoid unnecessary administration with an integrated, paperless solution. Eliminate double data handling with the automatic import into MYOB Acumatica Payroll.

Streamline your processes

Reduce risk and maintain compliance by collecting the right documents at the start of the process including banking, tax, and superannuation information.
